1. The Jugovinil Factory is located at Kastel Sucurac, near Split. It was formerly a calcium carbide factory; now, under the Five Year Plan, it is being converted (and electrified by Rade Roncar of Zagreb and EMEG of Switzerland) to produce vinyl. There are conflicting reports as to the future production:

- a. To produce polyvinyl chloride plastics.
- b. To produce synthetic rubber at the rate of 10,000 tons per annum by 1951.
